

Canon
CANON VIRGINIA, INC.

Achieve more with less.

A mold builder and hot runner
supplier in one dedicated partner.

The Canon Hot Runner System does more than help balance your mold cavities. It enables you to reduce costs and lead times, drive efficiency – and helps make your greatest ambitions possible.

With the Canon Hot Runner System, you can:

- **Cut costs.** Hot runner systems are big investments for your business. With Canon Virginia, Inc. as your same-source supplier for mold making and hot runner needs, you can bundle the costs, gain efficiencies and reduce the total cost of production.
- **Reduce lead times.** We incorporate the hot runner into the mold-build schedule, so you don't have to wait for your hot runner to be manufactured and delivered. This can also help reduce lead times up to 40%.
- **Consolidate your supply chain.** As the builder of your molds and hot runner system, we can ensure high quality and precision. There's no dealing with third parties or separate purchases, which can make the entire process more seamless.

HOT RUNNER SIDE VIEW

The difference is in the details.

From controlled, gating systems to high tolerances, the Canon Hot Runner System elevates the quality and precision of your plastic injection molding.
